## atraco® SRM:Lite

Constant wall thickness in the cross section and over the length of seamless tubes is one of the essential features of good tubes.

atraco® demonstrably ensures better quality and efficiency in the automated production of seamless tubes.

The mobile app atraco® SRM:Lite gives you an additional read-only access to your atraco® system. The increased transparency allows faster problem identification and reaction.

atraco® SRM:Lite enables fast & portable monitoring

atraco® SRM:Lite makes the atraco® system even easier and more flexible to use: it turns every Android™ device into a mobile atraco® terminal. The app interface gives you insight into the current state of the system and its settings. This way you can give necessary instructions to operators on-site without having to be present.

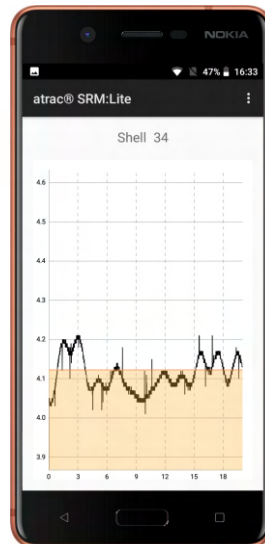

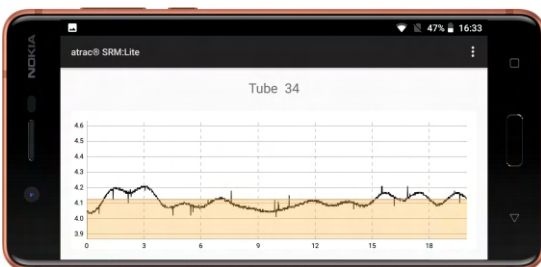

### atraco® SRM:Lite Highlights

#### Useful

- faster problem identification, shorter decision-making paths
- instant access to current and historical data: system statuses, production parameters, and selected measurement data
- automatic push notification in case of critical errors, such as wall thickness underruns

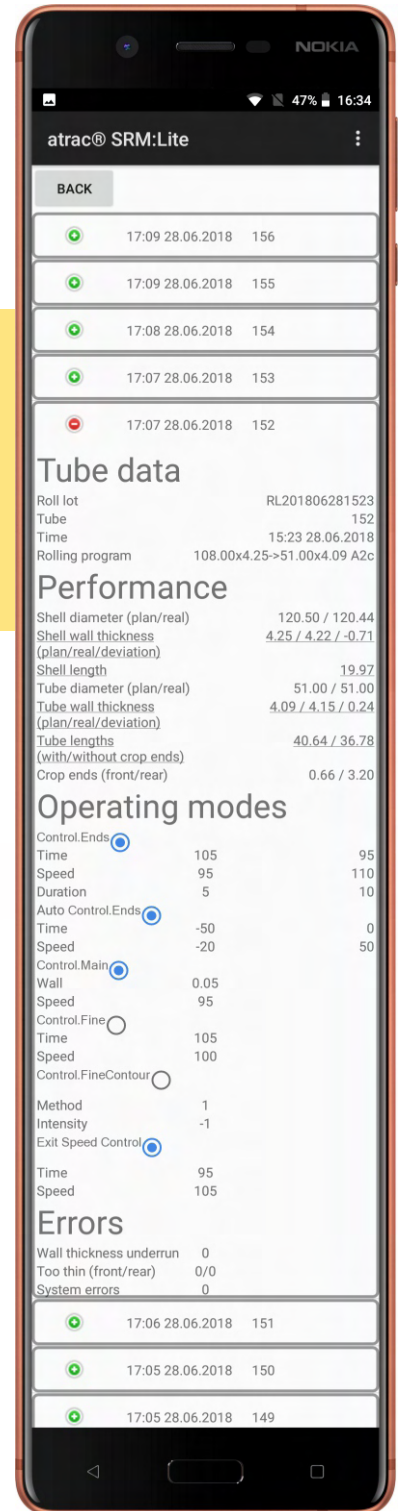

#### Secure

- read-only access: the settings cannot be changed accidentally

#### Portable

- atraco® terminal in your pocket
- connects wirelessly to the atraco® system
- designed for Android™
