

## **atrac® — Applied Tube Rolling Automation Concepts**

**atrac®** provides proven technology solutions for **the highest possible tube quality** and process automation solution for an **efficient utilisation of the material**.

### **Unique features of the atrac® system**

**atrac®** – leading edge technology:

- Innovative workflows (patent application);
- Modern, modular interface;
- New and improved control functions (patent applications);
- Robustness by simplified data traffic;
- Assured results by a new fall back solution without data traffic;
- Mini automation solutions (even without measuring systems, useful also for sizing–reducing mills).

**atrac®** development is a continuous process, aimed on incorporating newest, more efficient technology concepts. **atrac®** comes with a guaranteed technological and technical support.

Available for the **atrac®** customers:

- Support in tube making technology;
- Patented solutions for improving tube quality;
- Supply of tools like piercer points and others.

**atrac** is a registered trademark of
